

Web Design and Development Certificate Program

Successful website development requires content organization skills and a good grasp of the underlying technologies that help design and deploy a website. This set of four courses are designed to equip beginners and experienced developers with the requisite knowledge for developing websites using open source content management systems.

All courses are offered online.

September 9-22, 2009 Introduction to Web Design (XHTML and CSS)
October 7 - 20, 2009 Open Source CMS - Joomla
November 4-17, 2009 Building an E-commerce Website - Joomla
December 2-15, 2009 Open Source CMS Component Development Joomla

The curriculum is designed for all levels of familiarity, from beginners with an interest in web development, to experienced developers who are looking to further web development skills in open source content management systems.
